## Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-13, 16-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Taking claim 1 as exemplary, the claim is not directed to a practical application, there is no physical transformation nor is a useful, concrete and tangible result produced. The claim is directed to functional descriptive material which, per se, is not statutory. A data transformation is not a physical transformation. Data, by definition, is intangible, so the claim must go further to have a tangible result. The manipulation of data in a computer is not, in and of itself, sufficient for establishing that a claim is statutory. Thus, the claim merely results with a step of checking; this is not a useful, concrete and tangible result.

## Allowable Subject Matter

Claims 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lam et al. [U.S. Patent #5,084,824] disclose generating a simulation model according to terminal biases and boolean equations determined in accordance with a set of rules. Stanley et al. [U.S. Patent Application Publication #2004/0049370] disclose circuit simulation that includes matrix stamping.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leigh Marie Garbowski whose telephone number is 571-272-1893. The examiner can normally be reached on days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Chiang can be reached on 571-272-7483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
